MEMORANDUM FOR : Development Branch, DFD

ATTENTION :

[REDACTED]

25X1

SUBJECT :

More Fuel

1. P & W have on hand at their West Palm Beach facility a new fuel to their spec PWA 523. This fuel is supposed to be 19050 BTU/lb. and specific gravity of 7.6. I don't have the heat content of LF-1A or LF-2 but understand that the S.G. of LF-2 is 7.2.

2. Can you run through the numbers to compare this PWA 523 fuel with present U-2 fuels to see if PWA 523 has an advantage in heat content.

3. If significant a test in J-75 U-2 seems indicated.

4. [REDACTED] of P & W, West Palm Beach, can get a tank car of PWA 523 off to [REDACTED] any time you want.
